

All about Mice

Mice have teeth that never stop growing .They are light brown and they have some black on their back.They have tiny eyes .

Mice live in roof spaces.and they can also live in floorboards and wall cavities and they live in groups called mischiefs.

Mice eat sweet fruits,berries,nuts,plants and leftovers.

Mice can swim,jump and climb.

Mice do not hibernate, they spend the winter looking for food. A group of mice is called a mischief and last but not least a baby mouse is called a pinkie.
